

Cargo Control

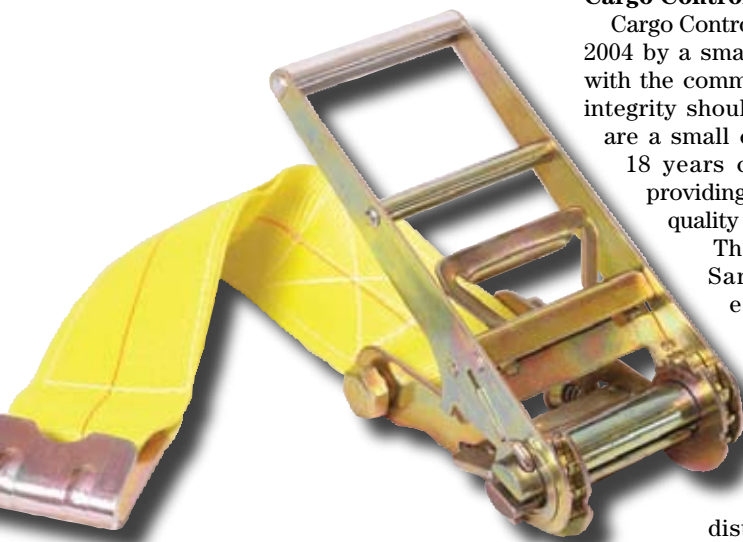

Cargo Control USA

Cargo Control USA was formed in April 2004 by a small group of share holders with the common belief that quality and integrity should mean something. They are a small company with more than 18 years combined experience in providing the trucking industry with quality products.

The company is located in Sanford, North Carolina; employee-owned; and proud to boast an unrivaled dedication to customers. They know that their ability to succeed is only possible by creating lasting relationships with distributors – relationships

built on trust, hard work and integrity. They believe they offer this by providing quality products, attention to service and detail, and the security of knowing you have a manufacturer that stands behind both their dealers and their products 100%.

Cargo Control products are sold only through qualified dealers, distributors, and OEM's. They support their dealers and work closely with them to design special promotions to meet their specific needs so that they have more freedom to offer their best values to their own customers. Cargo Control's dealers have confidence that they do not have to compete against them and this offers more freedom to provide the best service they can as well. They answer questions everyday from the end users to help

“No matter what your need to secure, Cargo Control USA has a solution for you!”

them get the products that they do need and then they are directed to their local dealer.

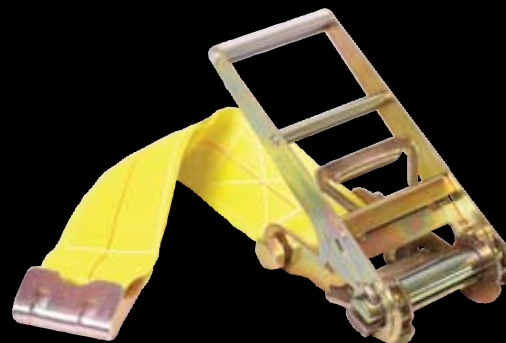

Cargo Control USA is one of few companies today that truly manufactures tie down products here in the United States. It is not just their company name, but also their mission to bring to the industry, products made in the USA. Many changes have evolved in this industry in recent years. Unfortunately, many dealers and consumers do not really know what they are getting in today's market of cargo control. Import products are everywhere. Cargo Control does not attempt to compete on price level between American made products and those that are manufactured outside of the US. Instead, they offer a domestic product at a competitive price, and the service beyond what the customer asks for.

Cargo Control believes that cargo control is not rocket science and they know that they are not the only game in town. They are, however, a supplier that will work hard to earn your business because they believe that it must be EARNED. This country is an amazing country that we have been given and they accept it as their responsibility to offer products made here.

No matter what your need to secure, Cargo Control USA has a solution for you! They offer a complete line of tie downs for flat beds, enclosed trailers, utility trailers, car haulers, air lines, and much more. They proudly support our military and provide them with custom restraints to meet their specialized needs.

Complete Cargo Solutions: Straps, Chains, Binders & Winch Products.

Because Cargo Control's tie downs are made in North Carolina, they also offer custom design and manufacturing to meet specific requirements as well. They are honored to be the approved supplier for POWER HEAVY DUTY over the past three years.

Cargo Control has local manufacturer's reps in each of the 50 states, Canada, and Mexico and an inside sales team to help with placing orders and to answer your questions.

Ratchet Enterprises, L.L.C.

Tired of your cargo straps getting tangled on equipment or dragged and worn?

Tired of constantly untangling your cargo straps when getting them out of storage or unstrapping cargo?

The new Tie Down Tamer is here to help solve all of those problems. Ratchet Enterprises out of Toledo, Ohio has developed a new technology with a revolutionary design that will help keep unused cargo straps neatly coiled and out of the way. The Tie Down Tamer is a self storing cargo strap that will help eliminate tangling, dragging and whipping.

This new technology in the cargo control industry has been introduced to the public with an overwhelming response at the 2007 Mid America Truck Show and The Las Vegas Truck Show. Industry professionals and truckers are excited about the new and revolutionary Tie Down Tamer.

Production of our new product begins this summer and the product should hit the market early this fall.

*Domestic and Foreign Patent Pending
