- Individually wrapped to protect from dirt and dust
- Color coded for easy capacity identification
- Double Jacketed

Our endless round slings are strong and versatile. Perfect for any lifting application and designed not to scratch or damage article surfaces. Because of the endless design, wear points can be shifted thereby extending the life of the sling. These endless slings are constructed of double jacketed tubular webbing, surrounding a continuous loop of specially designed polyester fibers, and engineered to be UV and abrasion resistant. They are certified for overhead lifting. Round slings are color coded in accordance with WSTDA specifications for easy identification.
